

SLF-L Series

PTFE membrane cartridges for solvents

MIF
Masterfilter

Masterfilter SLF-L series hydrophobic PTFE filter cartridges

Masterfilter SLF-L hydrophobic PTFE filter cartridges are composed of hydrophobic PTFE membrane. Its features include exceptional organic & inorganic corrosion resistance and inherently hydrophobicity. They are highly recommended for the pre-filtration and sterile filtration of strong solvents, highly corrosive fluids and strong oxidant fluids.

Applications

- Organic-based Antibiotic
- API
- Solvents
- Aggressive chemical products

Features and Benefits

- Inherently hydrophobic
- Broad chemical compatibility
- Absolute rating from 0,2 to 10 µm
- Low extractables
- Pleated surface provides excellent flow rates
- Manufactured in a cleanroom environment

Materials of construction

- **Membrane:** Hydrophobic PTFE
- **Support Layers:** Polypropylene
- **Inner core:** Polypropylene
- **Outer cage:** Polypropylene
- **End caps:** Polypropylene
- **O-rings:** Silicon, EPDM, Fluoroelastomer

Operating parameters

- **Max. differential pressure:** 6,9bar @ 25°C
2,4bar @ 80°C
- **Max. differential pressure reverse:** 3,0bar @ 25°C
1,0bar @ 80°C
- **Steam sterilisation:** Inline up to 100 cycles
@ 135°C /30 min
- **Autoclave:** up to 400 cycles
@130°C/30min

Filtration Area 0,2µm 10" Module: 0,78 m²

Quality assurance

- Sterilizing grade is 100% integrity tested before release
- Manufactured under ISO 9001:2015 certified quality management system and cGMP

SLF-L Series

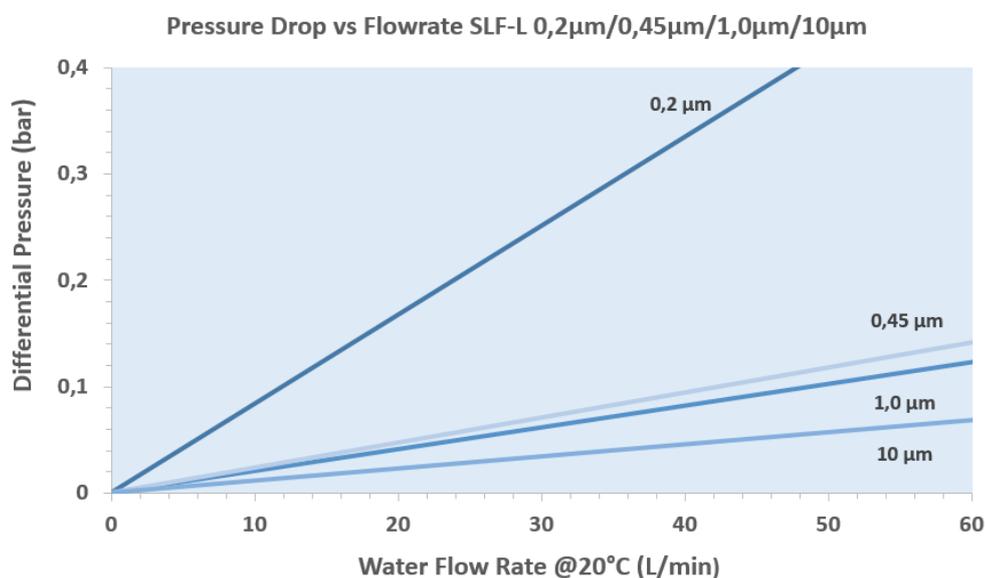

PTFE membrane cartridges for solvents

Biological standards

- 0,2 µm tested with B. diminuta (ATCC191546) with concentration $\geq 10^7/\text{cm}^2$
- Meet the criteria of the USP <88> Biological Reactivity Test for Class VI-121°C plastics
- Non fibre releasing per Title21 of the US Code of Federal Regulations (CFR) 210
- Non -Pyrogenic per USP Bacterial Endotoxin (<0,25 EU/ml)
